To Whom It May Concern,

Re : Letter Of Testimonial

First of all, we would like to thanks **BCA System Sdn Bhd** for introducing **HandPunch Biometric Recognition System** into our company. This Handpunch System uses a revolutionary technology to verify employees' identities in less then one second, based on their unique size and shape of their hands. Our employees also wear Bar Code ID cards, which are scanned by a Bar Code reader, attach to each Hand Punch machine.

By employing Hand Punch Geometry Biometrics with our payroll software, we are utilizing new technology to control payroll cost, eliminating buddy punching and watching the clock for rounding punches. It also ensures payroll accuracy by simply requiring each employee to be present, no cards or other credentials are needed, losses due to buddy punching are eliminated

Great job to BCA System Sdn Bhd and their technical team for their support. All of you have done a great job in responding our needs.

We will definitely recommend you to our associates company and business partners.

Yours Faithfully,

FUNAI ELECTRIC (M) SDN BHD
