To Whom It May Concern

RE : Testimonial For HandPunch Biometric Recognition System

We wanted to have a time clock system that would keep our employees honest, so BCA System recommended the **HandPunch Biometric Recognition System** to us. We had been using the Bar Code Swipe System but the **HandPunch Biometric Recognition System** to ensures the person checking in physically there. We want to eliminate the time cards and automate both security and payroll. We also want to positively identify the person checking in and that is why we have purchased **17 units of HandPunch Biometric Recognition System**. This is because we feel it is less invasive then other biometrics, such as Finger Print and Iris Scan.

It is important to get employees quickly in and out . . . finger scans are impractical for large populations. Your on-site technical represents BCA System with a high standard of professionalism and integrity.

Thanks again and keep up the good job.

Yours Faithfully,
