RE : Testimonial For myHR@suite- Human Resource Management System

We have been a user of **myHR@suite** system program such as the **pAY@man** and **tiME@man** , and implemented by **BCA System Sdn. Bhd.** since 2002 . We appreciate their system program since it can be easily learned and used even by our newly-hired hr staff.

Also, we have used **handkey II** integrated with this system, and we believe that hand geometry is most effective and accuracy when there are larger employee populations, and it was proven! **Handkey II** has saved us a lot of time, effort and inaccuracies. We can even edit problems before payroll is run.

The long time that we have been using their system just shows how much we are satisfied with them and that we have not encountered any difficulty and problem with them over those years. We also have the confidence to recommend them to others who are looking for good system program for their human resource department.

Thanks again and keep up the great job.

Yours faithfully,
For **SOODE (JOHOR) SDN BHD**
