To Whom It May Concern,

RE: Letter of Testimonial

We would like to take this opportunity to state our gratitude for the consummate service that provided by BCA System team.

Our company has been using the Hand Punch Biometrical Reader and their software's (time@man, job costing system). This system is user friendly in which its data collection and report generation could be performed easily and quickly.

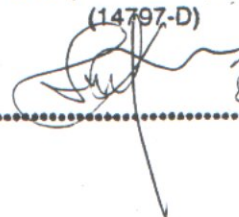

Should problems occur, the support team is prompt with their problem solutions and they follow through on every call where they responded quickly to any of our concerns. At the same time, we will definitely recommend their service and products to whom are looking for good system.

Thank you and keep up the good service!

Yours faithfully,

WATERCO (FAR EAST) SDN. BHD.
